

The peripherals shown are just a sample of the vast range of sensors, detectors and other wireless peripherals available from Rosslare Security.

# System Peripherals:

## Wireless Motion Detectors

PYR-3011

Advanced Wireless Ceiling PIR Motion Detector

PYR-2011

Advanced Wireless Spherical Lens PIR Detector

SA-01P

Wireless Pet Immune Passive Infra-Red Detector

## Wireless Smoke and Heat Detectors

SA-14

Wireless Optical Smoke Detector

SA-15

Wireless Ionization Smoke Detector

SA-16

Wireless Maximum Heat Detector

## Wireless Remote Control, Emergency Button & Keypad

SA-33

Wireless Keyfob with Emergency Button

SA-04

Wireless Waterproof Emergency Button

## Wireless Magnetic Contacts

SA-20

Wireless Vibration Detector

SA-32

Compact Cylindrical Wireless Magnetic Contact and Shock Sensor

## ELECTRICAL SPECIFICATIONS

- DC input power
- Current consumption
- RF frequency
- Internal sounder output
- Antenna type
- Backup battery type

## OPERATIONAL SPECIFICATIONS

- Zones
- Zone types
- User interface
- Onboard PGM outputs
- Tamper protection
- RF jamming detection
- Programmable no-activity timer
- Aux output
- Modem speed
- PC Upload/Download Customer Management SW
- Reporting format
- User codes

## ENVIRONMENTAL SPECIFICATIONS

### HLX-40

13.8 VDC @ 800 mA from transformer  
Standby: 120 mA  
Maximum: 350 mA  
433.92 MHz (G-series), 868.35 MHz (H-series)  
87 dBA @ 1 m (3.28 ft)  
Dual-diversity antenna  
12VDC SLA, BT-05, 800mAh or BT-16: NiMH 12VDC, 2Ah

### HLX-40A

40 zones: 39 wireless, one hardwire with tamper input  
Interior, perimeter, delay, fire, 24Hr silent and audible, chime (non-alarm)  
16-key backlit keypad and LCD (two lines of 16 characters), speaker, mic, two LED indicators  
2x 200mA, fully programmable (on/off/toggle/timed)  
Wall removal detection  
YES  
1-30 minutes, per zone  
12 VDC, 500 mA (maximum)  
2400 Baud  
YES, Using MD-62 cable connection or via the modem from remote PC  
Contact ID  
22 codes - 1 Installer, 1 Master and 20 users

### HLX-40B

Indoor use  
0° to 60°C (32° to 140°F)  
0 to 85% (non-condensing)  
> 20 V/m up to 1000 MHz

217 x 144 x 48 mm 8.54 x 5.6 x 1.9 inch	217 x 144 x 50 mm 8.54 x 5.6 x 1.9 inch	217 x 144 x 48 mm 8.54 x 5.6 x 1.9 inch

# Advanced Burglar & Fire Alarm

- The Flexibility to Conveniently Install All System Elements
- The Innovation of The Latest In Security Technology
- The Elegance and Finesse From an Award Winning Designer

5504-0024301-00

**Complete 2-way voice and listen-in capabilities, allows voice-guided messaging and control options**

## The Freedom to Feel Safe in Your Own Home

Wouldn't you like to feel safe & secure in your own home when in, as well as when away?

With HomeLogiX™ you can be confident that your family is protected and your home's security is in good hands. In case of an alarm, the system will immediately connect with a central station using 2-way audio communication for immediate response personnel. The panel's built-in voice dialer can also report alarms and other irregular system events to any private phone (up-to 3 numbers), land-line or cellular, via a voice message or text notification (menu option). Panic, emergency, duress, and silent alarm options are easily available at the touch of a button (from the main panel, or key-fob) initiating a 2-way audio communication so you can freely communicate hands-free.

**Flexible, fully programmable 2 PGM automation features**

Want an intrusion alarm system that will work for your business?

HomeLogiX™'s wireless communication supports a built-in keypad, internal and external sound system, and a two-line backlit LCD, that in addition to 40 zones (39 wireless and one hardwired), four remote keypads, four wireless repeaters, four wireless sirens, and eight remote controls, as well as 2-way RF products complete the solution for maximum peripheral security.

KE-30 – Battery Operated 2-Way Wireless Keypad

MD-CC101 – GSM Stick – GSM Communicator module for HomeLogiX panels

Furthermore, HomeLogiX™'s wireless communication option ensures that if the phone line is cut, the system is not compromised eliminating a would-be intruder's ability to disable communication by cutting the home's phone or cable lines. Anti-masking capabilities of our PIR sensors and advanced Tamper prevention complete the solution against compromising of the system.

capabilities of our PIR sensors and advanced Tamper prevention complete the solution against compromising of the system.

**Built-in PSTN, 2400 baud dialer/modem and Optional GSM reporting module expansion**

## The Freedom to Remotely Control and Monitor Your Home and Office

HomeLogiX™ introduces an exclusive interactive voice menu for monitoring and control capabilities by obtaining information about the system anytime from any remote phone. Once an incoming or outgoing call is initiated, HomeLogiX™ provides the user with a voice menu enabling remote services such as arming/disarming, status reports, two-way voice and listen-in, text messaging, and appliance control. An optional cellular module can be added to the system for complete security and communication options.

Designed for home automation comfort and control, the system offers flexible, fully programmable PGM automation features, including the re-programming of transmitter button functions.

**40 zones, 22 access codes, 3 arming types and 4 Arming methods**

## Self-Sustained and Wire Free

As intrusion alarm systems become a household necessity, most wireless burglar alarms are now able to provide reliable protection, without the havoc and expense of running wires.

Offering the latest in security technology, the HomeLogiX™ family of advanced burglar and fire alarm wireless solution, have all the benefits of advanced wireless technology, enclosed in a compact, aesthetic, easy-to-use control panel. All compatible accessories such as keypads, detectors, sensors and other peripherals are conveniently installed around your home or office, with the flexibility to add, remove, or change their location as desired.

Complete HomeLogiX solutions

## Security Made Simple Compact & Simple

HomeLogiX™ makes it easy to take advantage of a complete wireless alarm system with 40 wireless zones as well as accessories that are independent of the zones such as repeaters, wireless sirens, keypads, and transmitters, all in a compact and elegantly designed housing.

## Easy Operation

Want an intrusion alarm system that will work for you?

HomeLogiX™ easy to operate system will not take up any valuable time to install, nor will it require extensive remodeling for wiring and connection, in addition it's easy to use functionality will prevent delays upon entry or exit of the premises.

Easy to configure, set up and use, the straightforward, extremely easy system installation and operation does not even require you to consult the user manual for most applications and normal use as it is derived from a simple menu-driven settings option.

The HomeLogiX™ has a clear straightforward menu structure shown in an easy to read two-line backlit LCD display that provides all the necessary system information at a glance.

Automatic voice prompts in plain, easy to understand language (multiple languages available) for status indications and normal operation completes the simplicity of use.

HomeLogiX™ Security System can be armed and disarmed from anywhere, conveniently, over the phone. Scheduled arming per day of week is also available. Our systems can also be controlled by a keychain remote which includes a panic button that can alert the police when necessary.

**Textual, vocal and chime notification for every zone**

**User initiated message recording and playback**
